

Action Taken for Education Subcommittee
As of March 19th, 2003

Emily researched 35 grants. Sandra Whitehouse was asked to make initial contact for further information on six of these grants. Connie McGreavy agreed to look further into one, and three were passed on to the Waste Water committee. Eight of the grants were found to not be useful, either because they were no longer funded or not applicable. Emily sent an email requesting an application to two foundations. The Water Resource Board has already applied for one of the grants Emily researched. Many of the EPA grants require further research, and Emily emailed Robert Adler to request information.
